Dear Mr Crerand

## **Kettleburgh Terminal Pumping Station**

Since our Parish Council meeting in January, when you and Pete Holland gave us details of your plans to prevent any further instances of effluent overflow, we are pleased to report that no further overflows have occurred.

At our meeting on 16 March, it was reported that you have carried out tests, flushing the system to see if the measures recently put into place are working. Once again, we are pleased that the measures you have taken seem to be working.

I am now writing to request an update on progress with the ditch survey, which was planned to discover which ditches in Kettleburgh need clearing.

I look forward to hearing from you.

Yours sincerely

Jackie Clark
