Dear Mrs Clark

Update: Kettleburgh Pumping Station

Thank you for your letter of 23rd March. It is pleasing to know that the measures we took during 2010 to reduce the overflows from Kettleburgh Pumping Station have been successful to date.

As you are aware from our January meeting the business had identified that the Brandeston catchment was the principal source of the excess surface water ingress to the foul sewer, this resulted in the on-going problems we were experiencing in Kettleburgh.

Following that meeting I met with Suffolk County Council Highways and Suffolk Coastal District Council Environmental Health at Brandeston to gain an understanding of how the Brandeston ditch network could be improved to provide to allow a more effective method of draining the catchment of surface water run off.

I have also met informally with Brandeston Parish Council representatives to set out how Anglian Water would like to address the surface water issues in a structured way. They are very supportive of our proposals and have invited us to a full parish council meeting in May.

Prior to that meeting we will send information leaflets to every household in Brandeston outlining our proposals for the work we are planning.
